

Software Engineer Intern

Job Brief

This is a temporary intern position providing systems design and development support for ClearPoint's recordkeeping system and website. The Software Engineer Intern will use existing skills to enhance proprietary applications used by internal and external customers, and will grow their technical and communication skills by working on all aspects of software development, from design through deployment and support. This position will be based out of our Batesville, Indiana office.

RESPONSIBILITIES:

- Working under the direction of the Software Engineer, assist in the execution of the 2021 IT Development Plan
- Partner with ClearPoint team members to understand business needs for new functionality
- Develop new and enhance existing web applications and Windows services
- Provide system support
- Make recommendations for business process improvements
- Participate in design and code reviews
- Follow and enhance existing development processes

REQUIREMENTS:

- Actively pursuing or have obtained a degree in Information Technology
- Demonstrated understanding of object-oriented programming, UI design, and architectural design schemas for scalable web-based applications
- Familiarity with Microsoft Visual Studio or VS Code
- Solid object-oriented programming knowledge
- Experience in C#, SQL, JavaScript, HTML5, React, or similar technologies
- Understanding of Git, Node, NPM, and Azure DevOps
- Some experience in building applications
- A desire to learn about all aspects of the software lifecycle, including design, testing, and CI/CD
- Self-directed and results oriented with strong analytical and problem-solving skills
- Superb attention to detail with excellent written and oral communication skills
